**REALISE CONFIDENCE.  
OPTIMISE WORKFLOW.**

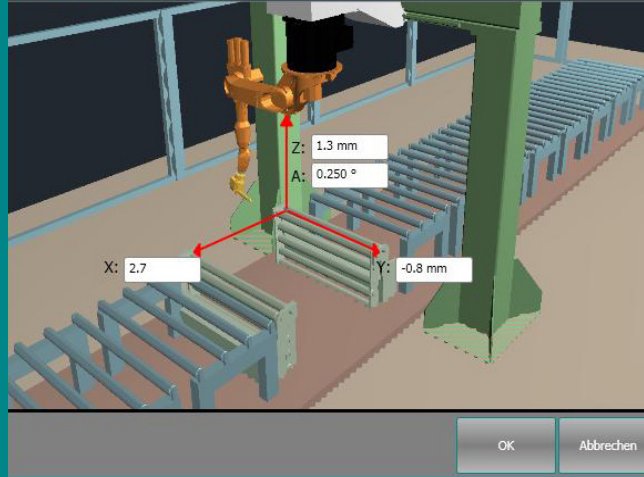

**UPDATE PACKAGE KC 1201**

**POWERFUL SOLUTIONS –  
PASSIONATE PEOPLE**

**KALTENBACH**

## REALISE CONFIDENCE

- ▶ **INNOVATIVE**  
Enhance your existing KALTENBACH KC1201 system with innovative technology from KALTENBACH' coping products based on high-tech engineering
- ▶ **TAILOR-MADE**  
Tailored service solutions to ensure a high uptime and availability – One solution from one partner
- ▶ **AFFORDABLE**  
Affordable solution to gain the latest technological improvement

## OPTIMISE WORKFLOW

- ▶ Improved program generation for complex components
- ▶ Processing close to the profile flange due to the possibility of „cutting free“
- ▶ Automatic speed reduction when burning small holes with plasma
- ▶ Cut angle compensation for plasma cutting
- ▶ Input option for profile tolerances
- ▶ Possibility for easy movement of the robot cell
- ▶ In case of pressure drop automatic retensioning of the clamps
- ▶ Automatic shutdown of the hydraulic pump
- ▶ Quicker processing due to:
  1. Before new positioning additional opening of the roller clamps is not required
  2. During repositioning process home ride is not required
